Comments or questions (8,192 characters max):

I pay approximately \$1000 a year to operate and maintain my well and now I hear they are considering metering my well.
When I purchased this property in 1998 I had rights to the water, now you want to take away part of the value of my home.

I'm very conservative with my water. My lawn is brown, most of my fruit trees are dead, I live in a yellow water home.
My neighbors are conscientious about their water usage.

This proposal is totally out of line and directed at the wrong part of our population. It is time for the city and the golf courses to "conserve". Every time I look at my decimated landscaping I get angry about what you are proposing.
